WINSOR HOMES— THE LEADER IN MODULAR HOMES

ABOUT US
Winsor Homes is owned and operated by the Winsor family, and we have been

in business since 1973. We are a complete contracting company providing our customers with an efficient, cost effective way to build a quality constructed home. We have built hundreds of modular homes throughout the state of New Hampshire which makes us experienced in all aspects of modular construction and design. Being a family business, the owners are your sales people; meaning there is no high pressure sales or sales commission, resulting in service and attention to detail. As a general contracting company, with many of our home projects we can help guide future homeowners through all aspects of the building process from lot set up to move-in. In fact, for 90% of the homes we sell, we contract the complete site work, foundation, well and all general contracting needs making your home purchase worry free.

OUR HOMES

Our modular homes, are built for us by either Custom Building Systems, LLC of Middleburg, Pennsylvania or KBS Building Systems of South Paris, Maine. All of our homes are constructed using 2x6 exterior walls (16" O.C.), superior insulation and quality building materials. Premium building materials are used throughout the home to ensure top performance. Many of the building materials as well as the state of the art architectural design used in our homes meet or exceed state and local codes.

MODULAR ADVANTAGES

The advantages of "going modular" are abundant. Modular Homes have revolutionized the building industry with their superior

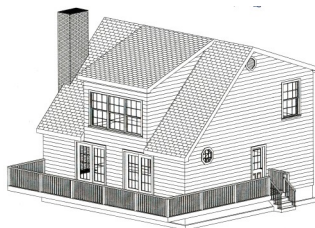

Production of a 28'x40' 4 Box Cape with 3 "A" Dormers

construction, cost effectiveness, energy efficiency and short construction time frame. Precision in modular design and construction lends itself to accurate scheduling without time delays due to subcontractors or materials. Being that modular homes are built indoors in a controlled environment, weather delays are not a factor. Costs are controlled through environmentally friendly production where wastes are reduced and recycling efficiencies.

FLOOR PLANS AND DESIGNS

We offer hundreds of layouts and designs that can be customized to suit your needs. Please feel free to contact us for a brochure. If none of the floor plans meet your needs, bring us your plans and with our complete custom building capabilities, we will build to your specifications. We can offer virtually any desired option within our homes.

OUR HOME PRICING

Our very complete and inclusive pricing is not found with other modular home companies. We

don't keep pricing a secret as all of our brochure floor plans are priced. All of our homes are priced complete to include delivery and crane costs, all plumbing and electrical connections inside the home by our licensed contractors, the complete forced hot water- oil (FHW-oil) heating system, and all interior and exterior trim out. As well as many other important inclusions exclusive to Winsor Homes.

THE WINSOR HOMES DIFFERENCE

Winsor Homes has the experience, attention to detail and know-how to build the home of your dreams. Given the many design options, cost effectiveness, quality construction, timely deliveries and

future heating energy efficiencies with a new modular home, we feel that building a Winsor Home is the only way to build your home.
